

## Approach to care for periodontal disease and dental caries

### Feedback

1. What advantages do you see in using the pathways in your practice for NHS patients?
2. What disadvantages or challenges do you see in using the pathways in your practice for NHS patients?
3. What help would your practice need ahead of using the pathways for NHS patients?
4. What would help your practice explain the pathways to your NHS patients?
5. What sort of training and education on using the pathways would help to support you and your practice?
